DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities:
(a.) The status of the parent application cited on page 1 of the specification needs to be updated.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. Claims 81 and 82 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The specification, as originally filed, does not provide support for the use of chemical detection as recited in claim 81. While Applicants have pointed to page 17 of the specification for support for all the limitations in claim 81, the use of chemical detection is not disclosed in page 17 of the instant specification.

The specification, as originally filed, does not provide support for the use of luminescence detection as recited in claim 82. While Applicants have pointed to page 17 of the specification for support for all the limitations in claim 82, the use of luminescence detection is not disclosed in page 17 of the instant specification.

Allowable Subject Matter

3. Claims 75-80 and 83-85 are allowed.
